dyson v15 detect absolute

Powerful. Intelligent. Versatile. For whole-home deep cleaning.

With 240 Air Watts of powerful fade-free suction[1] and up to 60 minutes run time[2] to deep clean your whole home.

Scientific proof of a deep clean[5]

Detects

Fluffy Optic™ cleaner head illuminates the microscopic dust and dirt you can't normally see on hard floors – revealing 2x more invisible dust. Brighter illumination reaches 300mm – so you don't miss anything[3].

Counts

A piezo sensor continuously sizes and counts dust particles passing through the inlet 15,000 times a second[5].

Reacts

A powerful Dyson Hyperdymium™ motor increases suction power when higher dust volumes are identified.[5]

Proves

The LCD screen shows the size and quantity of particles that are being removed. Giving you scientific proof of a deep clean[5].

Up to 60 minutes of powerful, fade-free suction.[2]

Fade-free power

A Dyson Hyperdymium™ motor generates 240AW of powerful suction.[1] Click-in seven-cell battery delivers up to 60 minutes[2] of whole-home cleaning.

Advanced cleaner head technology

Digital Motorbar™ cleaner head sucks up dirt, dust and hair from all floor types - automatically de-tangling hair and adapting suction power from carpets and hard floors[4].

Powerful 3-in-1 cleaning

The versatility of Dyson cordless technology makes cleaning your home easier. Powerful cleaning of floors, hard-to-reach places and mattresses.

Whole-machine advanced filtration

Dyson's fully-sealed system captures dust and seals in 99.99% of microscopic particles as small as 0.3 microns (µm).[6]

1. Bin cyclone

Removes the largest particles. Powerful centrifugal forces separate dust, dirt and hair from the airflow.

Wall Dok™

No-touch bin emptying

The Dyson V15 Detect Absolute vacuum drops into the wall-mounted charging dock, ready for your next clean.

Hygienic ejection mechanism drives dust and debris deep into your bin, in one action.

Key features

Cleaning modes

Auto mode automatically adjusts suction power across different floor types. Boost mode is for more intensive, spot cleaning and Eco mode for longer cleans on all floor types.

Easy to maintain

The filter and Fluffy™ brush bar can be washed, and the bin and tools wiped clean, to remove dust build-up and help optimise your Dyson vacuum's performance.

Click-in battery

Remove at the press of a button. Click-in batteries can be charged on or off the machine.

Combination tool

Two tools in one - brush and wide nozzle. For simple switching between tasks.

Crevice tool

Engineered for precise cleaning around tricky edges and into hard-to-reach narrow spaces

Specifications

Weight	Run time	Cyclone technology	Filtration
3.08 kg	60 mins[2]	14 scrolled cyclones	99.99% up to 0.3 microns[6]

Bin size
0.77 l

Height	Length	Width
1260 mm	265 mm	250 mm

[1] Suction tested to EN IEC62885-4 CL5.8 and CL5.9, tested at the flexible inlet, loaded to bin full, in Boost mode against the cord-free stick market. (Sales data from Apr 2020 to Mar 2021).

[2] Applies in eco mode on hard floor. Actual run time will vary based on power mode, floor type and/or attachments used.

[3] Compared to the original Dyson Laser Slim Fluffy™ cleaner head. Effectiveness influenced by ambient light conditions, debris type and surface.

[4] Dynamic Load Sensor technology only applies in Auto mode with the Digital Motorbar cleaner head attached.

[5] Best accuracy achieved in Auto mode. Auto ramp feature in Auto mode only. Testing based on average in home usage according to Dyson internal test data. Microscopic dust is defined as particles less than 100 microns.

[6] Filtration tested against EN60312-1 CL 5.11 in Boost mode.

[7] Based upon GB cordless market as of July 2022 – July 2023.
